PROFILE INFO

I am a passionate web developer with 6 months to 1 year of experience in front-end and back-end development. I have strong skills in HTML, CSS, JavaScript, and Python. I've built responsive interfaces using React.js and Next.js, and developed scalable backends with Flask and Django (Yangoo). I follow clean, efficient, and user-focused coding practices. I'm eager to join a team where I can contribute to real-world projects and grow as a full-stack developer.

WORK EXPERIENCE

Full stack Python Developer

- Developed a fully functional eCommerce website(using Flask Framework) with user authentication, product listing, and cart management.
- Integrated features like product search, order placement, and checkout using secure payment flow (dummy/payment gateway).
- Admin panel included for managing products, orders, and user data.

MMIT Python Certificate

Advance Python Programming & Application

- Built a women's clothing eCommerce website with HTML, CSS, and JavaScript for the front-end and Flask for the back-end.
- Implemented product categories, user authentication, shopping cart, and order placement functionalities.
- Developed admin panel to manage products and categories with a clean and responsive user interface.
-

Tomato Leaf Disease Detection System

- Built a CNN-based system to detect leaf diseases in tomato plants using image input. Achieved over 95% accuracy and added a chatbot to guide users on disease treatment. Deployed using Flask for real-time accessibility by farmers.
